

# PROJECT ESTIMATION

## BUSINESS INTRODUCTION

- > Finex started out as a HR consultancy practice providing HR related services such as payroll, HR consultancy, recruitment and staff outsourcing services.
- > The practice has since expanded and is represented by a few companies, the scope of services now include advisory, consultancy and outsourcing services.

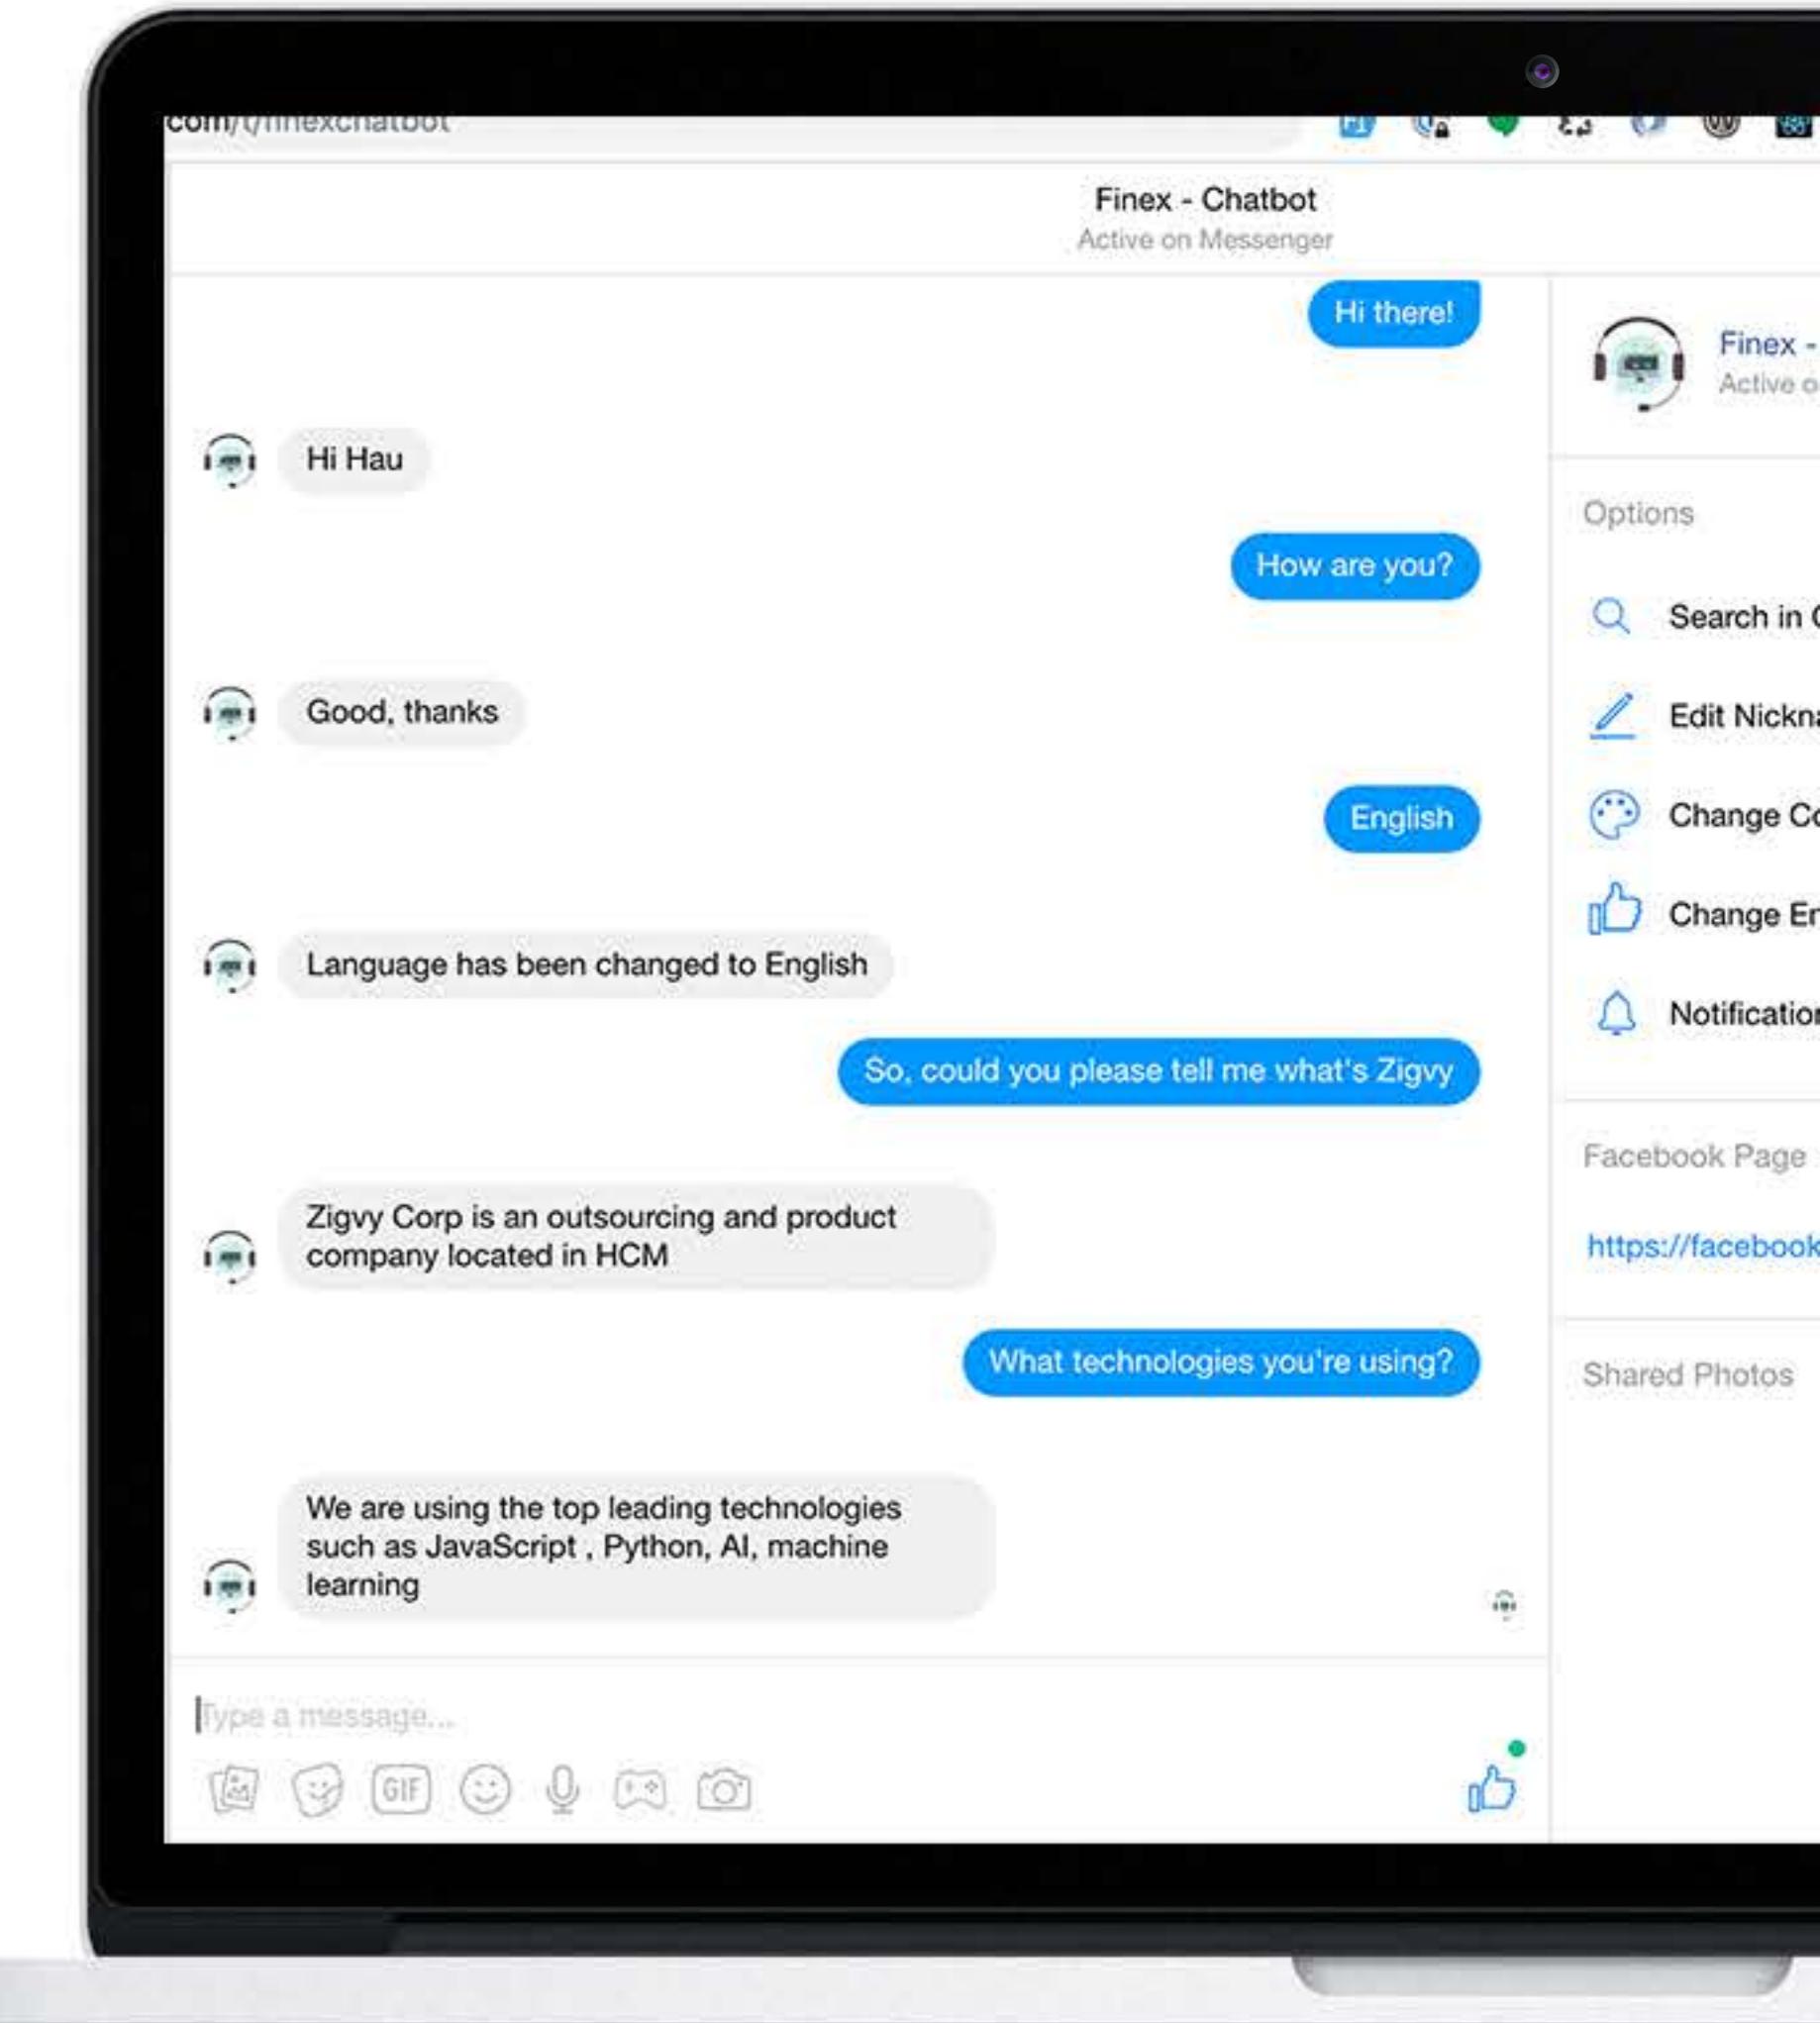

CLIENT  
**FINEX**

PRODUCT  
**Chatbot HR Consultant v1**  
iOS, Android and Web app

## SOLUTION OUTLINE

### Business Solution

- Targeting to small and medium company, who can't afford for a premium consultant services
- Small and medium firms also always encounter lots of trouble problems with HR, Taxes, Insurances, Law,..
- They even can't afford for an exclusive team to resolve that problem
- They even don't know where/who to ask and gets support their problems
- Finex - Chatbot using AI, OCR, NLP, NLU, and real agents will then solve those problems for them

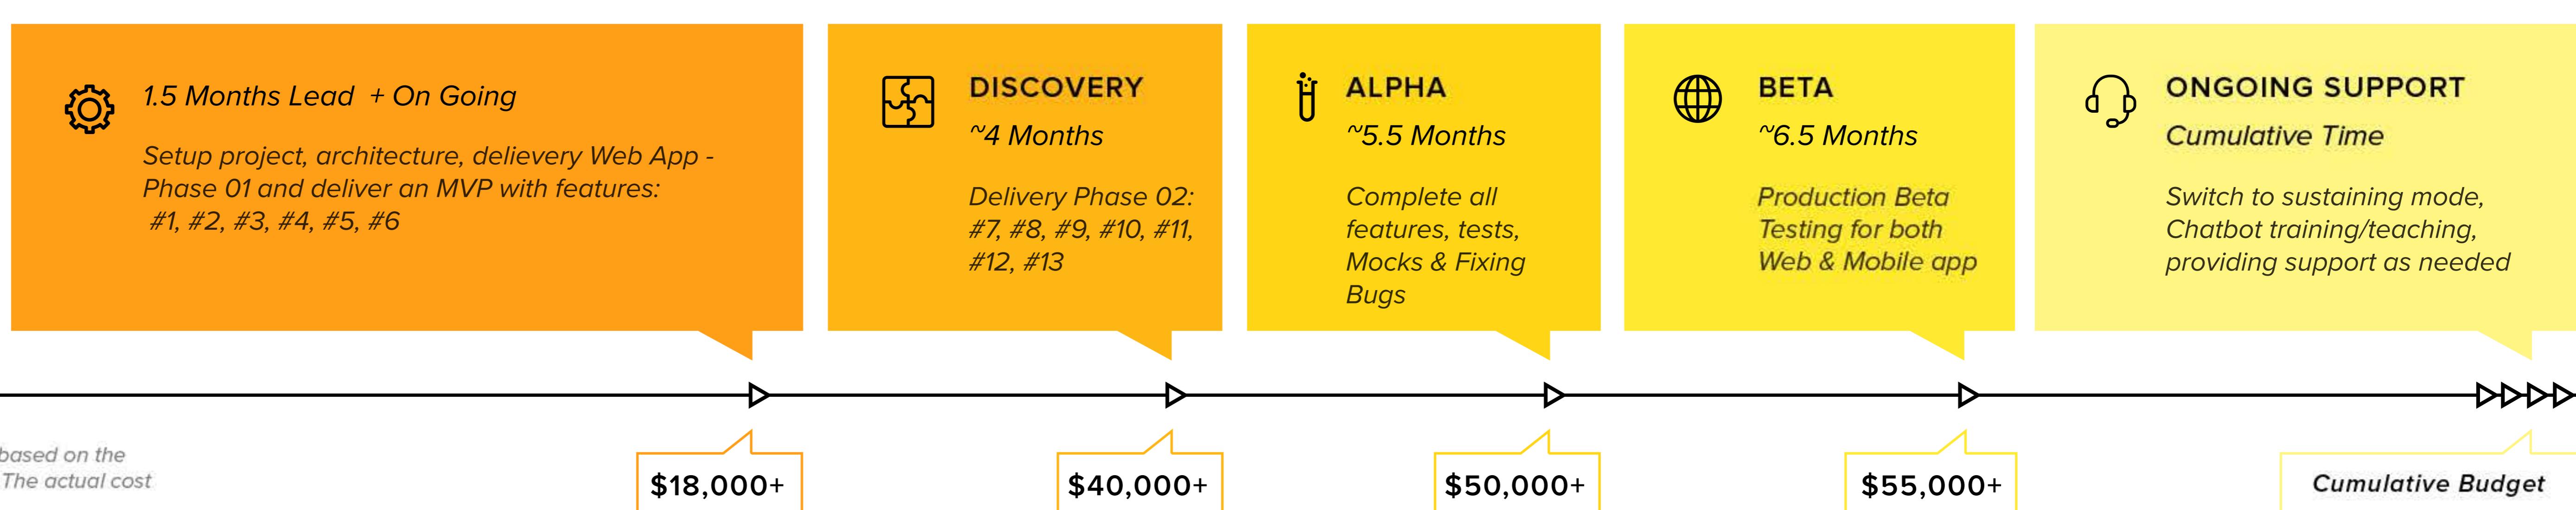

### Technical Architecture

The technical focus is on AI, OCR, NLP, NLU, Javascript, micro-services, & dev-ops

- Build a Web Interface and Mobile application for End-users and Admin users.
- AWS cloud for on-demand provisioning and auto-scaling (AWS Lambda).
- NodeJs RESTfull API deployed to AWS API Gateway.
- Continuous delivery via automated devops pipeline (Jenkins).
- BDD "black box" automated testing via mocks & tests.

The mockup above is just a demo, the actual design will be delivered when we start the project.

## DELIVERABLES & COST ESTIMATION TIMELINE

Note: The estimation costs here is just a rough estimate based on the bullet points of the specs which received from the client. The actual cost will be determined during the development process.
